Preface

In the Hamburg School rulebook there is a formula for enlightenment, namely Kronos/Poseidon. I will show here how to use this formula. With this formula, one can check the claim to be enlightened to see if it could be true, or determine possible times when it could occur.

We also take the sun, because firstly the sun represents the person, secondly the sun is the event indicator. That is why our formula is $\text{Kronos/Poseidon} = \text{Sun}$.

The important thing is that these three planets are linked together as a planetary picture. There are not many examples known to Enlightenment Time.

Nevertheless, from our examples it is clear that, firstly, the planetary picture for enlightenment must be present in the radix, and secondly, this planetary picture must be activated with the Sun, Kronos and Poseidon.

Used :

1- Krishnamurti Ayanamsa : $23^{\circ}45'56''$ for Year 2000.
Speed of precession is 50.2388475.

2 - Secondary Progression : 1 sidereal day = 1 sidereal year
Rate : $0.99726966 / 365.25636042 = .002730327978008$

Khan, Inayat

5 July 1882 at 23:00 (= 11:00 PM)Baroda, India, 22n18, 73e12

East Indian musician and poet, one of the spiritual giants of the twentieth Century and Muslim founder of the Sufi Order of the West.

Source Notes :

Leo in Modern Astrology 11/1932 quotes him for 11:00 PM, same in Sabian Symbols No.522. As Barodo was on Madras time, a correction of 28 minutes to Madras (west, so add) computes to 11:28 PM LMT.

(Greg Bogart quotes family records in NCGR Winter/1992, given as 11:35 PM. Madras time correction would compute to 00:03 LMT of the next day (7/06/1882). Perhaps family records had already made the correction of LMT but had calculated the time difference as 35 minutes rather than 28 minutes.

Realization :

In November 1895 Venkataraman realized that Arunachala, the sacred mountain, was a real place.[21] He had known of its existence from an early age, and was overwhelmed by the realisation that it really existed.
